

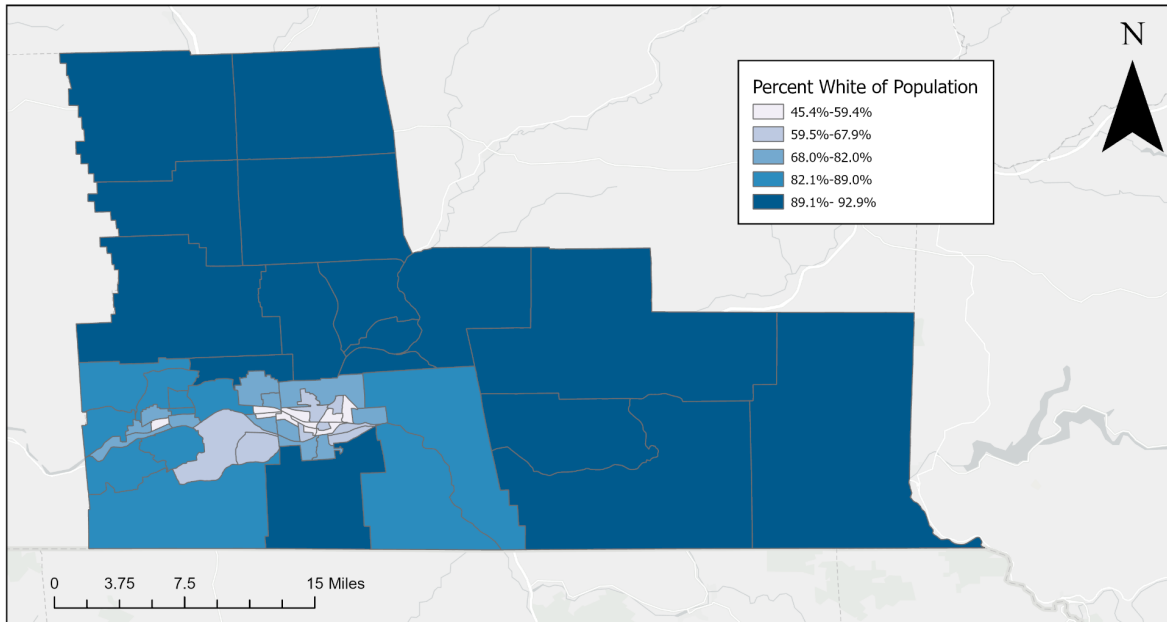

Map 1:

White Population Percent of Broome County, NY, by Census Tract (2020)

River Strumwasser
11/2/23

Data from CRP 4080 2020 US Census
GCS: GCS North American 1983

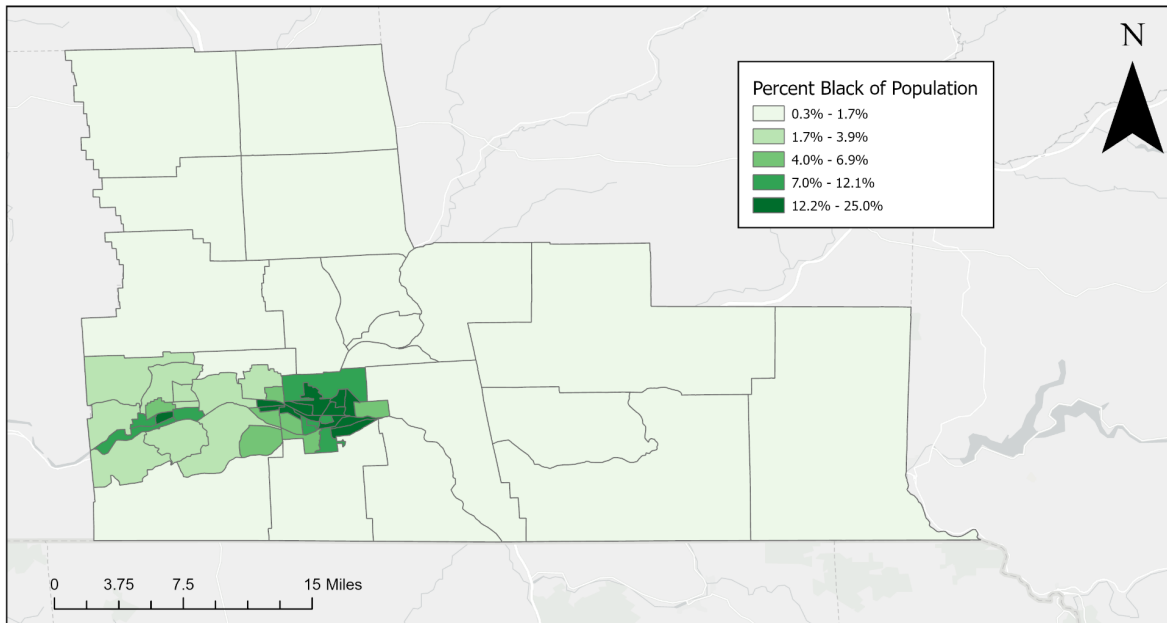

The white population of Broome County is the majority of most areas, with the lowest densities of white people still being around $\frac{1}{2}$ of the population of the area. The concentration is lowest around urban areas, and highest (nearly the entire population) around rural areas.

Map 2:

Black Population Percent of Broome County, NY, by Census Tract (2020)

River Strumwasser
11/2/23

Data from CRP 4080 2020 US Census
GCS: GCS North American 1983

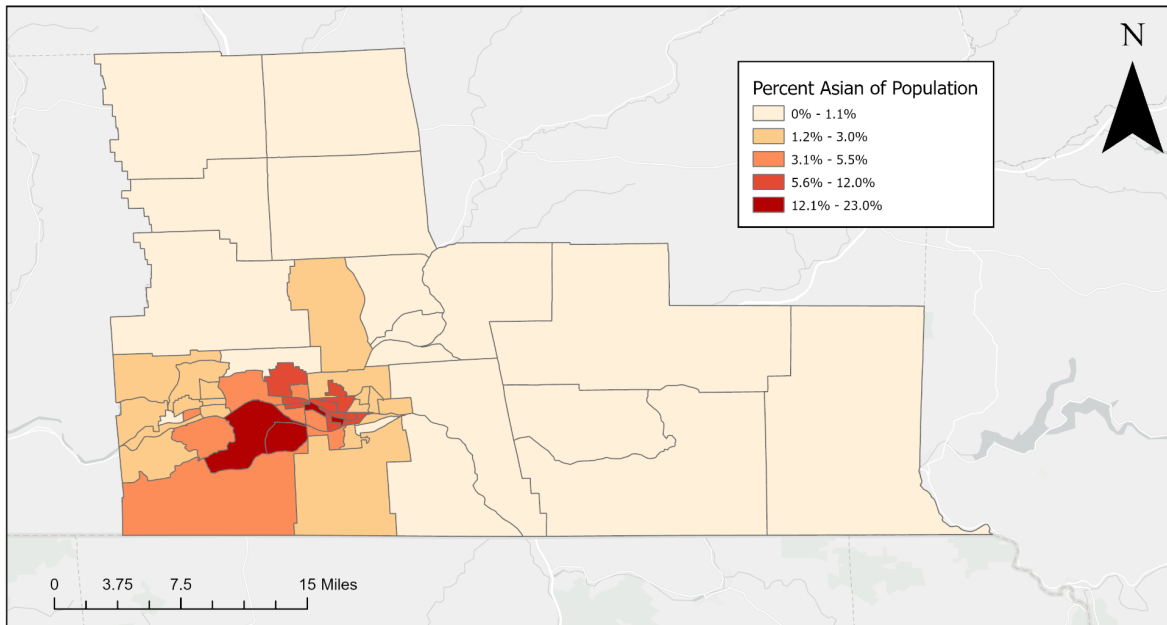

The black population of Broome County is a small percentage of the overall population of the area, but still makes up a significant minority of some census tracts. The population is very clearly centered around urban areas, and extremely small in rural ones.

Map 3:

Asian Population Percent of Broome County, NY, by Census Tract (2020)

River Strumwasser
11/2/23

Data from CRP 4080 2020 US Census
GCS: GCS North American 1983

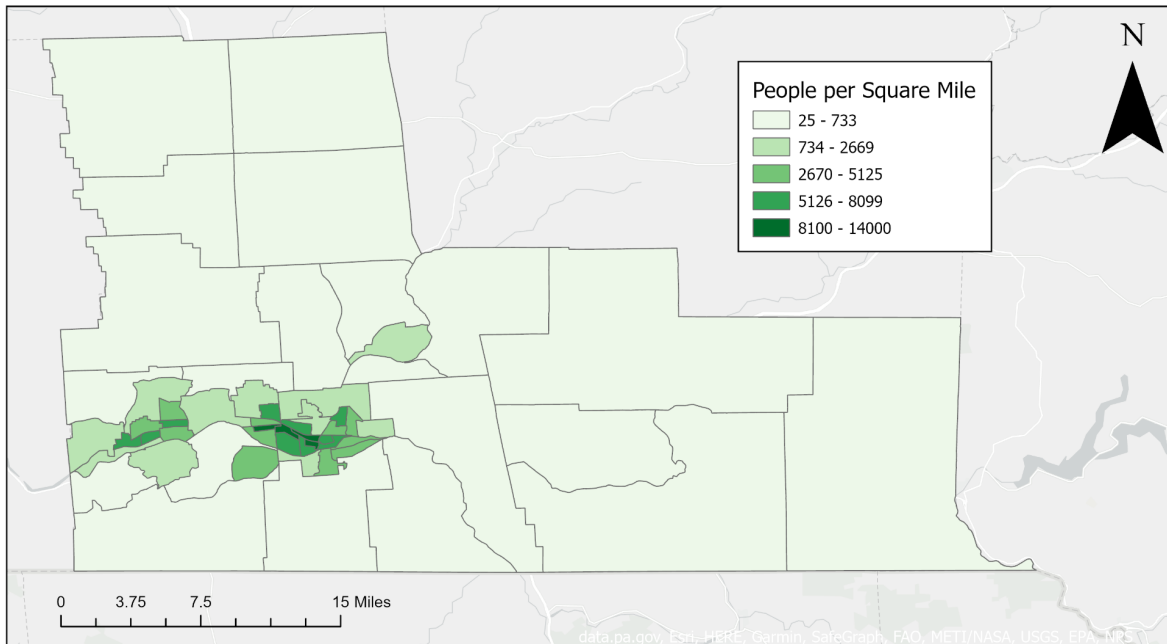

The asian population of Broome County is another small minority of the overall population. While the distribution skews towards urban areas, the real cluster of asian people in the county is around Binghamton University, with a high percentage of students being temporary residents from New York City.

Map 4:

Population Density of Broome County, NY, by Census Tract (2020)

River Strumwasser
11/2/23

Data from CRP 4080 2020 US Census
GCS: GCS North American 1983

The population density of Broome County has a clear gap between most counties and the few high values in the Southwestern portion of the county. This settlement pattern is clustered around the Susquehanna River, as the waterway makes economic activity and infrastructure easier, both in the present and historically.
